SUPERIOR POWER, THREE SPEED OPTIONS

The SUBLUE Vapor is perfect for everything from relaxed glides to thrilling races. It delivers consistent power at any speed and can generate an impressive thrust of up to 21kg. Choose from three exciting speed settings: 6km/h, 8km/h, or 10km/h. Whether you want to take it easy or go all out for an adrenaline rush, the choice is yours!

6km/h **8**km/h **10**km/h

ALO 2.0 PROPELLED BY A JET PUMP, THE POWER EXPERIENCE IS UNIMAGINABLE

Fueled by state-of-the-art ALO 2.0 (Active Loop Optimization) technology, SUBLUE Vapor propulsor's ingenuity sets unprecedented standards. Outfitted with a 6-blade impeller and

a 12-blade rear guide vane, it masterfully translates torque into an exhilarating surge of forward momentum, granting you unrivaled control and excitement.

IMMERSIVE LCD DISPLAY YOUR UNDERWATER DASHBOARD

SUBLUE Vapor's 4.3-inch LCD screen is your underwater dashboard! It makes it easy to keep an eye on battery levels, speed, direction, water temperature, and depth. You can even customize the settings to fit your preferences, making your underwater adventure more enjoyable and personal.

An underwater scene featuring a diver in silhouette at the top, surrounded by a large school of small fish. The water is a deep blue-green color, and the lighting is dramatic, with a bright light source from above creating a shimmering effect on the water's surface.

**DEPTH ALERT & DEPTH
CHANGE RATE ,
SEAMLESSLY NAVIGATE DEPTHS
UP TO 40M**

The SUBLUE Vapor's smart depth system has your back underwater. Set your own depth limits based on your skills, and it'll give you a heads-up when you're getting close. Plus, it helps you avoid quick depth changes, making your dive safer and more enjoyable. Whether you're a beginner or a pro, you can explore confidently all the way down to 40 meters.

* The recommended maximum descent speed is 18 meters per minute, and the ascent speed is 9 meters per minute, making transitions smooth and easy.
